

# Fall Management Product Considerations

## Your Partner in Fall Management

Creating an environment that is both enjoyable and safe for your residents requires a daily focus by all members of your community teams.

Your team cares about reducing falls, and your partners at Direct Supply are committed to bringing you products, information and education that support your team's goal of promoting resident safety.

Although research demonstrates that not all falls can be prevented, there are evidence-based interventions that may be effective in reducing the risks that contribute to falls, such as multi-factorial fall risk assessments, individualized interventions, standardized systems and processes, environmental modifications and staff education.

In this guide you'll find quality items you can depend on to help you create a safer environment – with options to help you address various types of fall risks, based on the needs of each individual resident.

***You know your residents; we know the equipment. Call us with the unique caregiving challenges you face, and we'll do our very best to help you find solutions.***

# Fall Management Product Considerations

## RESIDENT ROOM

### Examples of some of the important areas to check include:

- ✓ Bed is locked; height is adjusted appropriately for transfers
- ✓ Handrails for transferring are firmly attached at an appropriate height
- ✓ Floor and walls have a clear and clutter-free path from the bed to the chair and to the bathroom
- ✓ Lights work; lighting is set to minimize glare off walls and floor
- ✓ Bedside table, call light and personal items are all within reach
- ✓ If a personal alarm is in use, verify whether it's required and in use for bed, chair and wheelchair
- ✓ Chairs in room are appropriate height for the resident to safely sit with their feet on the floor, and are suited for ease of transfer
- ✓ Chairs are sturdy and in good condition
- ✓ Call lights function and cords are selected that the resident is able to manipulate and use
- ✓ Floors are dry

### Products to consider:

- **Adjustable-height low beds** that allow for safer positioning and resident transfers
- **Mattresses with support bolsters** that provide a reminder and soft support to help reduce slips or rolls
- **Safety assist handles** to help provide support for bed positioning and transfers
- Consider a **trapeze** for residents who may have difficulty reaching or using a side-mounted handle.
- If an alarm is indicated, consider **alarms that connect to the nurse call system**. This will reduce agitating noise and minimize anxiety, while still alerting the nursing team
- Select **call cords** that the resident can hold and press; consider a flat pad or a breath-activated unit for residents who have difficulty holding and pressing a traditional call button

*Potential Product Considerations vary based on individual circumstances, and other options may exist.*

Visit [DirectSupply.net](https://www.DirectSupply.net) for more product details – quickly search using the item number.

### BATHING & TOILETING

#### Examples of some of the important areas to check include:

- ✓ Call lights in room and bathroom work with adaptable cords, if needed
- ✓ Raised toilet seat is in place, if applicable
- ✓ Lighting is bright enough in shower areas, but minimized to avoid glare in bathrooms
- ✓ Bath benches are at the appropriate height, rubber feet are intact and provide a firm floor grip
- ✓ Verify all items are within reach – soap, shampoo, washcloth, towels, etc.
- ✓ Sturdy transfer bars are placed at an appropriate height and in good condition; check shower area and bathrooms for transfer bars
- ✓ Floors are dry

#### Products to consider:

- Verify **raised toilet seats** are the right height for the resident. Feet should be on the floor at all times
- Select **bath benches** that are adjustable in height and fit the shower area appropriately. Benches should be easy to transfer a resident to and provide enough support to allow the resident to feel comfortable and relaxed
- Place **transfer bars** in natural “grab” locations to help minimize reaching, which can throw residents off balance

### CREATING CAREGIVER AWARENESS

#### When an alarm or alert is utilized, keep these precautions in mind:

- ✓ Ensure individualized resident assessments are completed and indicate the use of an alarm/alert
- ✓ Check where and when an alarm/alert is needed. Consider all areas where one might be needed i.e., bed, chair, wheelchair
- ✓ Alarms/alerts are checked daily to ensure batteries are charged, as indicated
- ✓ Pad placements are checked after each transfer and re-positioning in bed, chair or wheelchair
- ✓ Verify caregivers are notified of changes to the care plan for the use of alarms/alerts
- ✓ Evaluate effectiveness of the alarm/alert as an intervention, and adjust as indicated
- ✓ If color-coded identification is used, verify that the use of color is consistent within the facility and that staff are aware of the color distinction

#### Examples of some of considerations when selecting an alarm/alert:

- If an alarm is indicated, consider **alarms that connect to the nurse call system**. This will reduce agitating noise and minimize anxiety
- Consider ease of use when resetting the alarm/alert.
- Consider using wireless alarms to reduce cords and wires

#### Examples of some of considerations when selecting patient identification:

- Consider resident dignity when choosing a **color-code to indicate fall risk**. Be consistent in color selection

## WHEELCHAIRS & MOBILITY AIDS

### Examples of some of the important areas to check:

- ✓ Wheelchair is the right size for the resident
- ✓ Cushion is in good condition, with proper support selected for the resident's needs
- ✓ Seat support is appropriate for the resident to provide a natural sitting position with proper support
- ✓ Wheels move easily and are firmly attached
- ✓ Wheel locks are easy to manage and stay firmly locked until released
- ✓ Leg/footrests are the right size and length
- ✓ Leg/footrests are securely attached and easy to take on/off if needed
- ✓ Anti-rollback and anti-tip devices are applied as indicated
- ✓ Gait belts are in good condition with no rips or tears, and buckles work effectively; gait belts are in good supply
- ✓ Walkers are properly fitted to the right size for the resident
- ✓ Walkers are sturdy and in good condition
- ✓ Walker wheels work, lock easily and stay firmly locked until released
- ✓ Wheelchairs and walkers are cleaned and maintained regularly

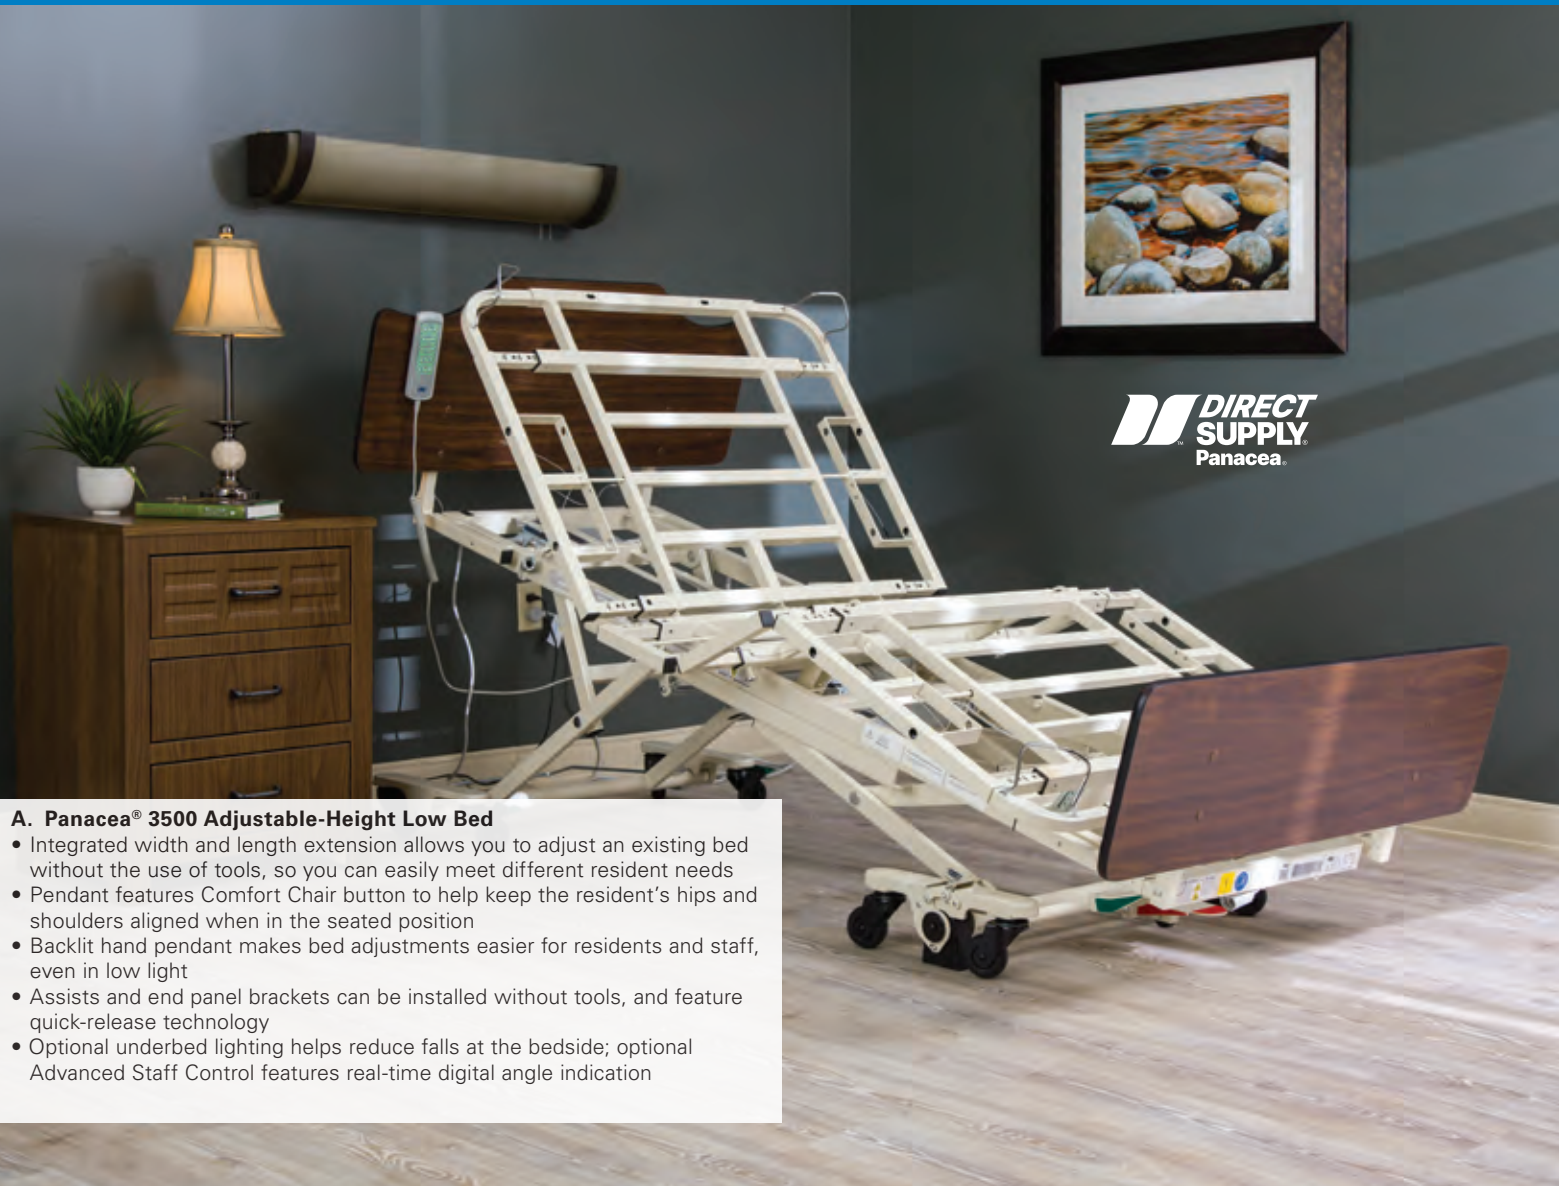

### Products to consider:

- Work with a therapist when sizing a **wheelchair** for the correct size
- Consider additional supports in a wheelchair to assist with reducing sliding and tipping. **Cushions** and **positioners** may provide some additional support
- Consider **accessories for the wheelchair** for residents to maintain personal items and a beverage. This can help prevent over-reaching for an item and loss of balance
- Evaluate the use of a tray or other convenience devices that attach to the chair, as these devices may be considered restraints. Consult your restraint use policies and all applicable laws and regulations

*Potential Product Considerations vary based on individual circumstances, and other options may exist.*

## C. Direct Supply® Multi-Bed Pivoting Assist

- Our most popular assist for Panacea beds is now compatible with a variety of bed brands and models
- Allows you to standardize on one common assist style, simplifying maintenance, caregiving and resident use
- Unique bracket design includes slotted hole pattern that accommodates some of the most common Long Term Care beds, including models from Panacea®, Joerns, Graham-Field and more
- Handle design has a small profile that easily pivots out of the way when not in use
- Fits beds with ½" diameter assist device mounting holes in the head deck (hole spacing supported: 7½", 9¼", 10¼", 10½" and 12½")

#6VY08 Single Assist

#6VY09 Set of 2 Assists

## D. Direct Supply® Zero Opening Assist

- Versatile assist device is compatible with a variety of bed brands and models
- Sleek, simplistic design features no openings in the handle, minimizing risk of entrapment
- Helps residents reposition themselves in bed and allows for ergonomic hand positioning when egressing from bed
- Slim profile can easily pivot out of the way when not in use
- Unique bracket design includes slotted hole pattern that accommodates some of the most common Long Term Care beds, including models from Panacea®, Joerns, Graham-Field and more
- Also fits beds with ½" or 5/8" diameter assist device mounting holes in the head deck (hole spacing supported: 7½", 9¼", 10¼", 10½", 12½")

#B9G93 Single Assist

#B9G92 Set of 2 Assists

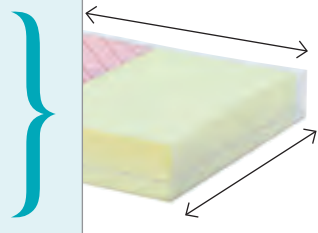

## 1 SELECT FIRMNESS

Choose from our soft Support Mattress or medium Original Mattress, both customizable to help meet the unique needs of your resident population.

## 2 SELECT SIZE

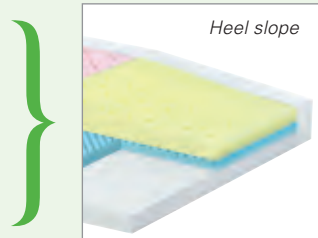

Choose from a variety of mattress sizes to accommodate all of your residents.

## 3 SELECT CONFIGURATION

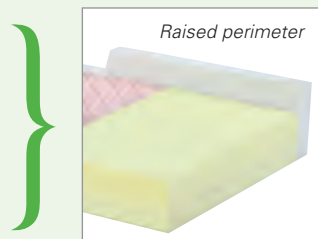

### Heel Slope

Helps redistribute pressure to the calf and increase resident comfort.

### Raised Perimeters

Help reduce the risk of falls, limit the need for bedrails and make transfers easier.

Built-in firm side perimeters and optional raised perimeters help reduce the risk of falls and make transfers easier

#43360

### Panacea® Original

Soft

Firm

Specifications	Panacea® Original & Panacea® Support
Weight Capacity	500 lbs.
Foam Type	Polyurethane
Firm Perimeters	Yes
Heel Slope	Yes, Optional
Cover Type	4-way stretch
Mattress Depth	6"
Meets 16 CFR 1633	Yes
Limited Warranty	7-year, non-prorated on foam core; 1-year on cover

### A. Panacea® Original & Support Mattresses

- Die-cut top layer provides comfortable pressure redistribution, creating individual load bearing cells to cradle residents and improve airflow
- High-resiliency, super-soft foam heel area protects heels, while optional heel slope improves pressure redistribution by redirecting pressure to the calves
- Full-length base provides a firm, supportive foundation to prevent bottoming out

#### Panacea Original Replacement Covers

- #43895 Original Cover, 35"W x 80"L
- #F3439 Original Cover, 35"W x 80"L, Heel Slope

See [DirectSupply.net](https://www.directsupply.net) for bariatric sizes.

\*Assuming bed and mattress are appropriately sized. Always test the full bed system if accessories are added. These pressure redistribution support surfaces may be appropriate for use as part of an overall care plan to help prevent and treat decubitus ulcers. Resident-specific assessment could alter your particular usage of these mattresses.

**Bi-fold design  
easily stores  
under the bed**

### A. Panacea® Foldable Bedside Mat

- Ultra-low profile beveled edge and rounded corners help prevent tripping and enable casters to roll over with ease
- Fire-retardant, high-density polyurethane core with durable vinyl top cover and anti-slip bottom
- Reinforced vinyl has high tear resistance and strength for added durability
- 1-year limited warranty

**#G2095** Foldable Bedside Mat,  
24"W x 70"L x 1 1/8"H, Gray

### B. Direct Supply® Bedside Mat

- Specially designed for easy cleaning
- High-density foam helps absorb impact of a fall
- Bi-fold design allows for a more convenient storage solution when the mat is not in use
- 1-year limited warranty

**#84393** Non-Fold Bedside Mat,  
24"W x 66"L x 2"H, Gray

**#2BF83** 36"W x 70"L x 1"H, Burgundy

Yes, you can.

#### D. Free-Standing Overbed Trapeze

- Wide range of height adjustments and handbar positions lets residents change position and transfer in and out of bed with minimal assistance
- Assembles without tools; features bumpers and padded mounting brackets to help protect walls from damage
- Installs easily into the sturdy floor stand, which slides under the head of the bed and folds flat when not in use

#54638 Trapeze Bar, 61"H, 34" Reach

#54640 Floor Stand, 38"H x 32"W x 40"L

#### E. Drive Trapeze

- Use for both in-bed movements as well as movements between a bed and a chair
- Designed to assist larger residents in changing positions
- Adjustable chain slides easily into position

#E7862 Free-Standing Silver Trapeze, 1,000 lb. Capacity

#E7861 Free-Standing Trapeze, 650 lb. Capacity

#### F. Panacea® Freestanding Trapeze

- Easy, tool-free setup can be done in a matter of minutes
- Assist handle can move along the length of the boom for easier positioning
- Includes adjustable-height assist handle and wheels on back of base for tilted rolling
- With a 37½" clearance between the base's legs, this unit will fit conveniently around the base of nearly any bed
- 225 lb. weight capacity

#E3430 Panacea Freestanding Trapeze

Mimi Knudsen  
Senior Product Manager

## Aid resident independence with trapezes

Trapezes are either secured to a floor stand or mounted directly to the frame at the head end of a resident's bed. They allow residents to reposition themselves in bed without calling for a caregiver's assistance. Residents can also use them for help getting in and out of bed.

For more tips on resident mobility  
visit [DirectSupply.com/Resources](https://www.directsupply.com/Resources)

### A. Direct Supply® Raised Toilet Seat

- 300 lb. weight capacity
- Clamp-on locking mechanism is easy to adjust for a secure fit
- Raised toilet seats feature tool-free assembly
- Limited warranty: lifetime on frame; 1-year on parts; 90-days on seat

#### For Elongated Toilets

#36326 3" Raised Seat without Arms or Legs, Case of 2

- Manual base widening models feature an easy to use foot pedal for reduced caregiver strain
- Design includes an adjustable knee pad for resident comfort and ergonomic handles for residents to hold during lifting
- Anti-entrapment feature stops lift if it senses an obstruction
- Spring-loaded clips at sling attachment points help keep resident secure during lifting

#GV271 Atlas Sit-to-Stand Lift, Manual Base  
 #GV272 Atlas Sit-to-Stand Lift, Powered Base

### C. Direct Supply® Multi-Brand Compatible Slings

- **Full-Body Slings**  
Offers support for the head and neck, while providing comfort and security for residents during transfer
- **Divided-Leg Slings**  
Easy to use, versatile design can be attached in a variety of ways for different applications
- **Toileting/Hygiene Slings**  
Commode opening allows easy toileting access and mesh fabric is washer-safe
- **Transfer Slings**  
Offers additional leg support during seated transfers
- **Padded Standing Slings**  
Padded design helps increase resident comfort while supporting residents with some weight-bearing ability
- **Gluteal Strap**  
Sit-to-stand strap for added stability during the use of the padded standing sling

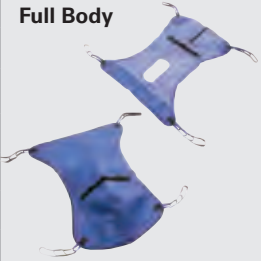

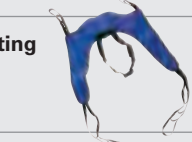

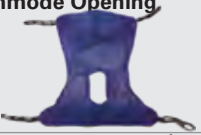

## Standardize & Save on Slings

Our multi-brand slings have passed rigorous compatibility testing standards for use with leading models of lift equipment.

So even if you have multiple brands of lifting equipment in your community, you can now depend on one affordable sling brand to help keep your staff and residents safe during transfer.

Check compatibility with a specific lift and view 3rd party documentation on compatibility testing at [re.directsupply.com/slingcompatibility](https://re.directsupply.com/slingcompatibility) or scan the QR code below.

## A. Direct Supply® Gait Belt

*Plastic quick-release buckle*

- Sturdy cotton belt with metal buckle or plastic quick-release buckle helps prevent back injury and assists in transfer and ambulation of residents

### Metal Buckle Gait Belts – Fiesta, Lavender, Navy, or Stars and Stripes

(Stars and Stripes color only available on the 60" belt)

- #2FT54 Metal Gait Belt, 54", Case of 10, Navy
- #2FT48 Metal Gait Belt, 60", Case of 10, Stars and Stripes
- #2FT41 Metal Gait Belt, 72", Case of 10, Navy

### Metal Buckle Gait Belts – Natural or Pastel

- #2FT61 Metal Gait Belt, 54", Case of 10, Natural
- #2FT37 Metal Gait Belt, 60", Case of 10, Pastel
- #2FT57 Metal Gait Belt, 72", Case of 10, Natural

### Plastic Quick-Release Buckle Gait Belts – Natural or Pastel

- #2FT50 Plastic Gait Belt, 54", Case of 10, Pastel
- #2FT35 Plastic Gait Belt, 60", Case of 10, Pastel
- #2FT60 Plastic Gait Belt, 72", Case of 10, Pastel

## B. Raizer® Liftup Chair

- Mobile chair safely transfers individual from the floor to a sitting or standing position in just a few minutes
- Minimal physical effort for the caregiver with ergonomic lifting to reduce injury
- 330 lb. weight capacity

- #GT639 Raizer II
- #GT640 Raizer M

### Accessories

- #GT642 Carry Case for Raizer II
- #GT634 Carry Case for Raizer M
- #GT646 Trolley
- #GT638 Seat Cover

## C. Direct Supply® Transfer Board

- Constructed of durable Birch wood, which is sturdy, resilient and does not splinter
- Features rounded edges for comfortable and easy handling, as well as a smooth sanded surface
- Reduces the amount of strain and pressure put on the user's body when transferring

- #396HP Transfer Board, 30"
- #396HM Transfer Board, 24"

## Mangar USA

### D. Camel Lifting Cushion

- Folds up for easy carrying
- Simple to use; minimizes moving and handling risk
- Residents must be able to roll onto their sides with help from staff to correctly place cushion; a slide sheet can also be used
- Suitable for indoor and outdoor use

#E3433 Camel Lifting Cushion

## BRODA®

Pedal positioning chairs offer a lower seat to floor height allowing for the user to still foot propel while slightly tilting the seat back to help prevent posterior pelvic tilt

### E. Broda Encore Pedal Wheelchair

- Ergonomically designed enabling users to self propel while increasing independence
- Low hemi style seat-to-floor height with front pivot seat tilt maintains proper position for self-propulsion
- Comfort Tension Seating® provides optimal pressure redistribution
- Universal legrest mounts and optional dynamic rocking feature to calm and create contentment
- 350lb weight capacity
- 33° Seat Tilt

#7BT80 Encore, 18"W x 17"D, Tall Back, Black Frame, Black Padding, 5" Casters

#7BT94 Encore, 22"W x 17"D, Short Back, Black Frame, Black Padding, 20" Front Mags

Tilt and recline positioning chairs allow for the ability to open the back and tilt the seat so the user is in an optimal position in the event they experience involuntary movement, posterior pelvic tilt or any other postural side effects caused from neurological disorders and poor postural control.

**DIRECT SUPPLY**  
Panacea.

espresso gunmetal regimental blue

## A. Panacea® Tilt & Recline Chair

- Smooth operating tilt and recline mechanism
- Comes standard with seat and back cushions, full-length armrests, padded legrest, adjustable headrest and lateral supports
- All supports can be easily removed if not needed or easily adjusted to fit the resident

- #2FR36 Tilt & Recline Chair, Standard Legrest, Gunmetal  
#2FR68 Tilt & Recline Chair with 20" Wheelchair Wheels, Standard Legrest, Gunmetal  
#2FR40 Tilt & Recline Chair, Height-Adjustable Padded Footplate, Gunmetal

**DIRECT  
SUPPLY**

### A. Direct Supply® Anti-Rollback Device Multi-Brand Compatible

- Intuitive and quick to install, with compatibility on most standard wheelchairs
- Brake arms activate automatically when resident stands, eliminating backward movements to improve safety during ingress & egress; chair operates normally while resident is seated
- Non-intrusive design allows wheelchair to fold for storage without removing device and does not impede a caregiver's stride when walking behind the chair
- Tool-free adjustment of brake bars, counterbalance bars, and spring force to match many wheelchair designs; quick-release pins won't loosen or come out of adjustment over time

**#J6K87** Direct Supply Anti-Rollback Device,  
Multi-Brand Compatible

**Safe-t mate®**

### B. Safe-t mate® Universal Rear Anti-Tippers

- Fits any make or model and easily interchangeable between chairs
- Infinite height adjustment
- Large 2" easy-gliding wheels for smooth maneuvering

**#75870** Universal Rear Anti-Tippers, Pair

**Safe-t mate®**

### C. Safe-t mate® Anti-Rollback Device

- Only compatible with Invacare EX2 and nonreclining SX5 wheelchairs with 16" back height
- Won't interfere with collapsing chair for storage or transport
- Brake arms activate immediately when resident stands, preventing backward movement

**#20535** Anti-Rollback Device

### D. Safe-t mate® Front Anti-Tippers

- Keeps hemi- or full-height wheelchairs stable
- Five height adjustments
- 2" easy-gliding wheels won't impede wheelchair motion
- Includes mounting hardware and easy installation instructions

**#81799** Front Anti-Tippers, Pair

**DIRECT  
SUPPLY**  
Panacea.

#### E. Panacea® Lateral Support System

- Adjusts laterally and vertically with hook-and-loop fasteners
- Easy-to-install lateral support; provides mild to moderate trunk support
- Fits wheelchairs 16" to 22" wide

#3V445 Left and Right, Small, 4"

#3V446 Left and Right, Large, 6"

**DIRECT  
SUPPLY**  
Panacea.

#### F. Panacea® Rotating Arm

- Crowned palm area to avoid finger contractures
- Arm rotates 270 degrees
- Soft-molded urethane foam is highly durable and easy to clean

### ***Simpler. Faster. Smarter.***

A study conducted at Platte Valley Medical Center\* found new bladder scanner technology out-performed the leading national brand.

- 28% fewer scans due to improved accuracy and ease of use

In addition to clinical benefits, feedback from the nursing team concluded the innovative features in the device technology are preferred compared to other models.

- More than half don't want to "aim" – new probe design with eight transducers allows for automatic bladder detection
- Four out of five users prefer a wireless probe – a communication range of more than 30 feet allows the display console to be positioned remotely for added convenience; no cable to disinfect for infection control

***Take advantage of the next big thing in clinical technology today!***

\*Solano, Theresa. (2016) The Colorado Health Foundation Funded Grant. Prime Health Pilot Study.

#### **A. Attendant® Prodigy Bladder Scanner**

- Automatic bladder detection reduces the need for caregivers to manually aim the probe in order to locate the bladder
- Automatically detects male/female anatomy
- Probe features eight transducers with a full 180-degree field of view to automatically detect bladder and resident type
- Auto-calibration with each scan helps improve accuracy
- Accuracy of  $\pm 12.5\% + 12.5$  mL

**#G1749** Attendant Prodigy  
Bladder Scanner

#### **Accessories**

**#2RCYG** Rolling Stand

**#36D6R** 2X-Large, Pack of 6

## D. NorthShore EternaDry Booster Pads

- Designed to extend the life of adult diapers by adding absorbency, which is especially useful at night
- Feature Microsorb lining that is designed to fill to capacity and then pass additional fluid into the diaper or pull-on
- Soft and slim yet features super-absorbent polymers that lock away urine and wetness into odor-free gel
- Latex-free

**#36G2P** Small, Pack of 30  
**#36D4J** Medium, Pack of 30  
**#36D4G** Large, Pack of 30  
**#36G2R** X-Large, Pack of 12  
**#36G2K** 2X-Large, Pack of 10

## E. NorthShore GoSupreme Underwear

- NorthShore's most absorbent pull-up style diaper, offering extraordinary overnight protection while providing a better fit for individuals with unique body types
- Uniquely stitched to provide a closer fit to the body for extra comfort and leak protection.
- Extra-long contoured lining helps wick away liquid with more coverage for bowel and urinary incontinence containment
- Available in white or black

**#36G2P** White, Small, Pack of 14  
**#36G3B** Black, Small, Pack of 14  
**#36D6H** White, Medium, Pack of 14  
**#36G2X** Black, Medium, Pack of 14  
**#36D6F** White, Large, Pack of 14  
**#36G2V** Black, Large, Pack of 14  
**#36D6P** White, X-Large, Pack of 14  
**#36G3D** Black, X-Large, Pack of 14

## F. NorthShore MEGAMAX Tab-Style Briefs

- Oversized absorbent core is the most absorbent at NorthShore and provides excellent coverage in the front and rear even for side sleepers
- Tall stand-up leak guards, leg cuffs, and waistband elastics protect against leaks from the leg openings as well as around the waist
- Smooth poly plastic exterior is durable to resist sagging and odors even at max capacity
- Large, heavy-duty tape tabs are refastenable
- Available in white or black

**#36CWH** White, Small, Pack of 10  
**#36G3M** Black, Small, Pack of 10  
**#36CWF** White, Medium, Pack of 10  
**#36G3J** Black, Medium, Pack of 10  
**#36CWC** White, Large, Pack of 10  
**#36G3G** Black, Large, Pack of 10  
**#36CWF** White, X-Large, Pack of 10  
**#36G3Q** Black, X-Large, Pack of 10

### MATRIX

#### A. Matrix T3xm Medical Treadmill

- Class I/IIa Med CE certified for therapeutic, rehabilitation, and active aging settings
- Low start up speed and low step on height with extended handrails
- Starts at .1mph in forward or reverse
- Ideal for clinical use

#4BP89 Matrix T3xm Medical Treadmill

#### B. T6 Recumbent Cross-Trainer

- Features a low step-through design, 360-degree swivel seat and StrideLock mechanism for easy access
- Low-impact, total-body cardio and strength workout is ideal for users of virtually all fitness levels
- Dual touchscreen display, engaging workout apps and wireless technology enhance user experience
- T6 MAX offers a 22"W seat; T6 PRO offers an 18"W seat
- Accommodates users up to 500 lbs.

#7XW22 T6 MAX Recumbent Cross-Trainer

#7XW23 T6 PRO Recumbent Cross-Trainer

#### C. UE8 Upper Body Ergometer

- Dual HD touchscreen monitor
- Intuitive software with engaging programs and easy-to-track metrics
- Sit, stand or direct wheelchair access without removal or attachment of the seat
- 12-degree seatback recline
- Low starting force with 15 levels of resistance
- UE8PRO has standard 18" swivel seat with 360° access and 500 lb. weight capacity
- UE8MAX has wide 22" swivel seat with 360° access and 600 lb. weight capacity

#GTT09 UE8MAX Upper Body Ergometer

#GTT10 UE8PRO Upper Body Ergometer

#### D. RB8 MAX & Pro Recumbent Bikes

- Featuring a low step-through and custom ergonomic seat that swivels 360° and reclines 12° for easy access
- Dual touchscreen display with high-definition graphics and intuitive user interface
- Includes Bluetooth heart rate monitoring, USB port and 90W AC adapter
- Fits users from 4'6" to 6'7" and includes an extra-wide 22" seat
- 600 lb. weight capacity

#2TBRR RB8 MAX Recumbent Bike

#2TBRT RB8 PRO Recumbent Bike

# MATRIX

## Matrix Ultra Advantages:

- Ergonomic adjustment handle and gas shock enable simple changes in start position
- Oversized foot platform increases movement variety, including calf exercises
- Integrated assistance handle enables easy exit and entry
- Independent motion for greater exercise variety
- Action Specific Grips provide greater comfort and minimal point pressure

#M2364 Independent Biceps Curl

### H. Matrix Ultra Seated Leg Curl

#M2371 Seated Leg Curl

Fall Prevention - rate reductions of 39%—are seen from exercise programs that challenge balance and involve 3 or more hours/week of exercise\*

### A. HUR SmartBalance

- Perfect tool for assessing balance, accurately identifying users with a high risk for falling, and implementing results-based fall prevention and balance training programs
- Balance and stability training in seniors, older adults, rehabilitation patients, and in special needs athletes helps prevent falls
- Helps to ensure safety of individuals and their surroundings, and can maintain mobile independence for optimum quality of life

#34BJ9 HUR SmartBalance

### B. HUR SmartTouch Multifunction 4X Strength

- Space-saving multi-function machine allows clients to independently complete four different exercises, effectively working multiple muscle groups in both the upper and lower body, without moving from machine to machine
- Touch screen adjustments make it easy to switch between exercises for targeted training that works muscles in the chest, back, biceps, triceps, thighs, hamstrings, gluts, and hips.
- HUR SmartTouch Equipment comes with a digital, automated training system that allows for evidence-based, smarter, and more independent exercise and rehabilitation

#34TGY SmartTouch Multifunction 4X, Black Frame, Blue Upholstery
