**Get the Industry’s Top Performers**

Direct Supply offers the industry’s widest selection of oxygen equipment from brands you trust. Our product experts will help you choose the best units for your staff and residents.

Contact your account manager at 1-800-634-7328 today to learn more about Direct Supply’s lineup of quality respiratory equipment.

---

**Choose from a vast selection to meet your needs**

Oxygen concentrators provide respiratory users with increased mobility and flexibility for their active lifestyles. We carry a wide selection of the top models from portable to stationary to fit your community’s requirements.

- **5L Oxygen Concentrators**
- **10L Oxygen Concentrators**
- **Portable Oxygen Concentrators**

---

**You could save your community thousands of dollars every year when you purchase oxygen concentrators rather than opting for costly rental contracts. Many communities find the purchase pays for itself in the first year!**

Calculate your potential savings today at DirectSupply.com/Oxygen.

You’ll not only see your savings analysis, but videos on preventive maintenance and a huge selection of products to suit your residents’ needs, including options from Invacare – an industry leader in respiratory products.

5L concentrators are a mobile and affordable way to provide up to 5 liters of continuous oxygen per minute to residents. Key selection criteria (in addition to price point) include sound level, required preventive maintenance steps and power consumption. Most brands offer optional built-in alarms for oxygen purity and flow rate, which can help provide peace of mind when owning concentrators. The comparison chart below provides a high-level overview of the models in our offering. Proceeding pages will provide additional detail on each model, including visual guides for preventive maintenance steps.

- OPI oxygen monitor keeps track of purity levels; also available without monitor
- Only one filter to change every 2 years
- Durable metal cannula fitting
- Pressure-compensated flow meter displays accurate flow
- Turndown technology automatically activates at 2½ lpm or less to save energy and minimize stress on compressor
ATTENDANT® 5L OXYGEN CONCENTRATOR
5-LITER OXYGEN CONCENTRATOR

- Trusted Attendant® brand
- Easy to maintain – just 2 filters are easily accessible and need attention annually
- Low flow rate and oxygen purity indicators standard
- Alarms for power failure, sensor failure and low flow lasting > 10 minutes

Specifications:
- Flow Rate: 0.5 - 5 lpm
- O₂ Purity %: 93% ± 3%*
- Outlet Pressure: 5 psi ± 6.23 psi
- Power Consumption: 360W (average)
- Sound Level: ≤50 db
- Dimensions: 21 3/10" H x 13" W x 10 3/10" D
- Weight: 36 lbs.
- Warranty: 3 years or 12,000 hours of compressor usage

*0.5 - 5 LPM after running for 30 minutes

Preventive Maintenance

When changing residents:

Once a Year:
- Clean cabinet filter; replace intake filter

Once every 2 years:
- Verify the oxygen purity, flow rate and pressure of your concentrator by using an oxygen analyzer.
Verify the oxygen purity, flow rate and pressure of your concentrator by using an oxygen analyzer.

Check and, if necessary, change the air intake filter. We also recommend changing between residents.

Check and, if necessary, change the HEPA filter. Direct Supply suggests changing filter between residents.

Verify the oxygen purity, flow rate and pressure of your concentrator by using an oxygen analyzer.

When changing residents:

CAIRE® COMPANION 5™
5-LITER OXYGEN CONCENTRATOR

Once Every 2 Years:

• Maintains higher $O_2$ purity as flow rate increases
• Minimizes “exhale” noise for improved resident experience
• Reduces power consumption by 15% when running at 2 lpm or below
• Optional alarm screen displays error codes to specify technical issues
• Only two filters to change every 2 years — no weekly preventive maintenance

DirectSupply.net 9
Once a Week:
DEVILBISS® COMPACT
5-LITER OXYGEN CONCENTRATOR

• Purity sensor attached to the concentrator checks the purity level of the oxygen, allowing caregivers to feel secure that the oxygen flowing is safe for the resident
• Pressure-compensated flow meter displays accurate flow
• Turndown technology automatically activates at 2½ lpm or less to save energy and minimize stress on compressor

Once Every 2 Years:

Once Every 3 Years:

Once Every Year:

Once Every 2 Years:

Specifications:
Flow Rate: 1 to 5 lpm
O2 Purity %: 93% ±3% at all settings
Outlet Pressure: 8.5 psi
Power Consumption: 215W in Turn-Down; 275W at or below 2½ lpm
Sound Level: 48 dB
Dimensions: 15"W x 12"D x 24"H
Weight: 36 lbs.
Warranty: 3 years

Preventive Maintenance

Once a Week:

Clean the cabinet filter.

Once Every 2 Years:

Verify the power-loss alarm is working. Let the concentrator run for 1 minute then unplug the power cord. An alarm should sound, indicating it is working properly.

Check and, if necessary, change the inlet compressor filter. We also recommend changing between residents.

Check and, if necessary, change the microdisc bacteria filter. We also recommend changing between residents.

Verify the oxygen purity, flow rate and pressure of your concentrator by using an oxygen analyzer.

Check and, if necessary, change the final bacteria filter. We also recommend changing between residents.

Verify the oxygen purity, flow rate and pressure of your concentrator by using an oxygen analyzer.

When changing residents:

When changing residents:
10L concentrators provide up to 10 liters of oxygen per minute and are ideal for any residents with high flow needs, or those who are prescribed over 5 liters of oxygen per minute. Key selection criteria (in addition to price point) include sound level, preventive maintenance requirements, overall size, psi and presence of unique features. Higher psi levels are typically ideal for residents with longer tubing or trach connections. Some 10L models include unique features, such as dual flow meters and outputs, which allow up to 5 lpm of oxygen to be delivered to two different residents from one machine. Please review the information in the following pages to select the solution that best fits the needs of your residents.

### Manufacturer
- Invacare Respironics AirSep

### Unique Features
- Assembled in the USA and compatible with cylinder transfill systems
- Lightweight with a small footprint
- Exclusive DeVilbiss OSD® (Oxygen Sensing Device), standard on every unit
- Equipped with accessible patient controls, bright LEDs, protected cannula fitting and recessed humidifier nook
- Optional O₂ percentage indicator ultrasonically measures O₂ output
- Durable casters for easy transport
- Large humidifier assembly area
- High outlet pressure designed to power high-acuity respiratory accessories: nebulizers, ventilators, long oxygen tubing
- Simplified tracheostomy setup with jet nebulizer attachment
- Several alarms for added security
- Optional O₂ percentage indicator ultrasonically measures O₂ output
- Durable casters for easy transport
- Large humidifier assembly area
- High outlet pressure designed to power high-acuity respiratory accessories: nebulizers, ventilators, long oxygen tubing
- Simplified tracheostomy setup with jet nebulizer attachment
- Several alarms for added security

### Specifications:
- **Flow Rate:** 2 - 10 lpm
- **O₂ Purity %:** 87% - 96%
- **O₂ Pressure:** 20 +/- 1.0 psi
- **Power Consumption:** 639W
- **Sound Level:** 55 dB
- **Dimensions:** 13½" W x 12" D x 24½" H
- **Weight:** 42 lbs.
- **Warranty:** 3-year limited warranty

### Preventive Maintenance

#### Once a Week:
- Clean the cabinet filter.

#### Once Every 2 Years:
- Check and, if necessary, change the inlet compressor filter. We also recommend changing between residents.
- Check and, if necessary, change the bacteria filter. We also recommend changing between residents or every 12,250 hours.
- Verify the power-loss alarm is working. Let the concentrator run for 1 minute then unplug the power cord. An alarm should sound, indicating it is working properly.

#### Once Every 3 Years:
- Verify the oxygen purity, flow rate and pressure of your concentrator by using an oxygen analyzer.

### When changing residents:
- Discard oxygen tubing, cannula/mask, oxygen outlet connector, and humidifier bottle. Replace cabinet filter, clean concentrator cabinet. Inspect plugs, cords and components. Check oxygen concentration.

---

**Drive DeVilbiss® Compact 10L**

**10-LITER OXYGEN CONCENTRATOR**

- Several audible and visual alarms: high pressure, high/low flow, low oxygen, power failure
- Oxygen Sensing Device (OSD) standard
- 3-year limited warranty

Discard oxygen tubing, cannula/mask, oxygen outlet connector, and humidifier bottle. Replace cabinet filter, clean concentrator cabinet. Inspect plugs, cords and components. Check oxygen concentration.
RESPIRONICS MILLENNIUM M10
10-LITER OXYGEN CONCENTRATOR

- Optional alarms for purity and flow rate
- Large humidifier bottle area
- Filters replaced every 2 years

Preventive Maintenance

Once a Week:
Clean the cabinet filter.

Once Every 2 Years:
Check and, if necessary, change the inlet HEPA filter. We also recommend changing between residents.

Check and, if necessary, change the bacteria filter. We also recommend changing between residents.

Check and, if necessary, change the long-life filter. We also recommend changing between residents.

Verify the oxygen purity, flow rate and pressure of your concentrator by using an oxygen analyzer.

When changing residents:

Specifications:
- Flow Rate: 10 lpm (1-liter increments)
- O₂ Purity %: 92% ±4% at 8 - 10 lpm
  94% ±2% at 3 - 7 lpm
  92% ±4% at 1 - 2 lpm
- O₂ Pressure: 10 - 30 psi
- Power Consumption: 600W
- Sound Level: less than 50 dB
- Dimensions: 19"W x 13"D x 27"H
- Weight: 53 lbs.
- Warranty: 1 year

AIRSEP® NEWLIFE® INTENSITY 10
10-LITER OXYGEN CONCENTRATOR

- Available with single or dual flow meters and outputs
- Optional dual flow meter on 10 lpm models allows for two residents to receive up to 5 lpm at once
- Optional second output valve can be used for nebulizer treatments
- 20 psi output ideal for high flow needs

Preventive Maintenance

Once a Week:
Clean and, if necessary, change the intake (gross particle) filter. We also recommend changing between residents.

Once Every 5,000 Hours:
Verify the oxygen purity, flow rate and pressure of your concentrator by using an oxygen analyzer.

Clean and, if necessary, change the felt filter. We also recommend changing between residents.

Verify the power-loss alarm is working. Let the concentrator run for 1 minute then unplug the power cord. An alarm should sound, indicating it is working properly.

Once Every 2 Years:
Check and, if necessary, change the bacteria filter. We also recommend changing between residents.

When changing residents:

Specifications:
- Flow Rate: 2 - 10 lpm
- O₂ Purity %: 92% at 2 - 3 lpm, 90% at 10 lpm
- O₂ Pressure: 20 psi
- Power Consumption: 590W
- Sound Level: 40 dB
- Dimensions: 161⁄2"W x 141⁄2"D x 271⁄2"H
- Weight: 58 lbs.
- Warranty: 3 years

When changing residents:
Portable Oxygen Concentrators

Portable oxygen concentrators are the most lightweight and mobile O₂ delivery solutions available. Ranging from 4.4 to 20 lbs., these compact devices allow for AC, DC or battery power to allow oxygen therapy to be delivered while on the go. Resident activities, outside physician visits, general travel and power outages are popular reasons for using portable concentrators. Key selection criteria include flow rate (be sure to note differences between continuous and intermittent delivery options), battery life, size and weight. Please review the information on the following pages to select the solution that best fits the needs of your residents.

Preventive Maintenance

Once Every 1 - 2 Years:
Check and, if necessary, change the inlet filter. We also recommend changing between residents.

When changing residents:

Periodic intervals:
Clean and replace the cannula and tubing as instructed by the manufacturer and your equipment provider.

When changing residents:
Clean and disinfect the exterior covers of the device and rechargeable battery between patient use and as needed.

Delivers the highest oxygen output for portable concentrators weighing 5 lbs or less
External battery design is easy to install and change
LCD touchscreen is easy to read and use
Two battery option available: standard (up to 4.5 hrs) and extended (up to 9 hrs)

**CAIRE® ECLIPSE 5® PORTABLE OXYGEN CONCENTRATOR**

- Delivers the highest pulse dose oxygen output of any portable oxygen concentrator on the market.
- Features autoSAT technology, which adjusts to the resident’s respiratory rate as it increases and decreases.
- Continuous flow settings 0.5 to 3.0 lpm (0.5 liter increments).

**Daily:**
- Clean and, if necessary, change the air inlet filter or once per week. Replace annually.

**Once a Year:**
- Replace the HEPA filter. We also recommend changing between residents.
- Replace the compressor intake filter. We also recommend changing between residents.
- Test the oxygen purity every time the device casing is opened, which is once annually as part of yearly preventive maintenance.

**When changing residents:**

**Specifications:**
- Flow Rate: 0.5 - 3.0 lpm
- Battery Life: 2 hours at 2 lpm continuous flow, 5.1 hours at a 2 setting
- O₂ Purity %: 90% +5.5/-3%
- O₂ Pressure: 5 psi
- Power Consumption: 52W at 1.0 lpm continuous flow; 145W at 3.0 lpm; 45W at 1.0 pulse dose; 95W at 6.0 pulse dose
- Sound Level: 45 dBA at 3.0 lpm continuous flow; 40 dBA at 3.0 pulse dose setting
- Dimensions: 71/10"D x 123/10"W x 193/10"H
- Weight: 15 lbs.
- Warranty: 3 years

**CAIRE® FREESTYLE® COMFORT® PORTABLE OXYGEN CONCENTRATOR**

- UltraSense sensitive breath technology
- Ergonomic shape
- Color display and glow in the dark keypad
- Long battery life up to 8 hours
- Internal filters designed to last the life of the device—no replacement needed

**Daily:**
- Clean and, if necessary, change the air inlet filter or once per week. Replace annually.

**Once a Week:**
- Clean 2 air intake filters. Your oxygen provider may advise cleaning more frequently depending on operating conditions.

**Every 3-6 months:**
- Replace the nasal cannula and tubing every 3 months if daily use, or as recommended by the cannula manufacturer or your oxygen provider.

**When changing residents:**

**Specifications:**
- Flow Rate: 1 - 5 pulse settings
- O₂ Purity %: 90% +5.5/-3%
- Sound Level: 40 dBA at pulse setting 2
- Battery Life: Up to 4 hours with 8-cell battery pack.
- Up to 8 hours with 16-cell battery pack
- Dimensions: 73/10"W x 31/10"D x 10"H
- Weight: 5 lbs.
- Warranty: 3 years on concentrator, 1 year on battery and accessories
DRIVE DEVILBISS® IGO2
PORTABLE OXYGEN CONCENTRATOR

- SmartDose Auto-Adjusting Conserver Technology included
- Settings 1-5 pulse dose
- Rugged design, including protective overmold
- Weighs less than 5 lbs
- Most sensitive conserver trigger on the POC market

Specifications:
- Flow Rate: 1 - 5 pulse settings
- O₂ Purity %: 90% ±4/-3%
- Sound Level: 37 dBA at setting 2
- Battery Life: 3.5 hours on pulse setting 2
- Dimensions: 3.5” W x 8.6” D x 8.4” H
- Weight: 4.95 lbs.
- Warranty: 5 years device, 3 years compressor, 1 year sieve beds and battery

DRIVE DEVILBISS® IGO AMBULATORY
PORTABLE OXYGEN CONCENTRATOR

- Integrated PulseDose® oxygen conserving technology recognized for clinically effective pulse-dose oxygen delivery
- Built-in OSD® (oxygen sensing device) ensures accurate oxygen delivery and reduced periodic maintenance schedule
- Easy-to-read battery life gauge with fast battery charge time – 2 to 4.5 hours dependent upon the flow setting

Specifications:
- Flow Rate: 1.0 - 3.0 lpm continuous flow, 1-6 pulse settings
- O₂ Purity %: 91% ±3
- Sound Level: 40 dBA
- Battery Life: 1.6 to 4.0 hrs on continuous flow, 3.0 to 5.4 hrs on pulse settings 1-6
- Dimensions: 15” W x 11” D x 8” H
- Weight: 19 lbs with battery
- Warranty: 3 years on concentrator, 1-year on battery

Preventive Maintenance

Periodic intervals:
Clean and replace the cannula and tubing as instructed by the manufacturer and your equipment provider.

When changing residents:
Clean and disinfect the exterior covers of the device and rechargeable battery between patient use and as needed.

Weekly:
Clean Air Filter. Replace as needed and between patients.

Periodically:
Clean and replace the cannula and tubing as instructed by the manufacturer and your equipment provider.

Every 3 Years:
Replace internal intake filter. We also recommend changing between residents.

When changing residents:
Clean and disinfect the exterior covers of the device and rechargeable battery between patient use and as needed.

Clean Air Filter. Replace as needed and between patients.

Preventive Maintenance

Periodic intervals:
Clean and replace the cannula and tubing as instructed by the manufacturer and your equipment provider.

When changing residents:
Clean and disinfect the exterior covers of the device and rechargeable battery between patient use and as needed.

Weekly:
Clean Air Filter. Replace as needed and between patients.

Periodically:
Clean and replace the cannula and tubing as instructed by the manufacturer and your equipment provider.

Every 3 Years:
