Fall Management

Product Considerations

Your Partner in Fall Management

Creating an environment that is both enjoyable and safe for your residents requires a daily focus by all members of your community teams.

Your team cares about reducing falls, and your partners at Direct Supply are committed to bringing you products, information and education that support your team's goal of promoting resident safety.

Although research demonstrates that not all falls can be prevented, there are evidence-based interventions that may be effective in reducing the risks that contribute to falls, such as multi-factorial fall risk assessments, individualized interventions, standardized systems and processes, environmental modifications and staff education.

In this guide you'll find quality items you can depend on to help you create a safer environment – with options to help you address various types of fall risks, based on the needs of each individual resident.

- Resident Rooms (pages 6-11)
- Bathing & Toileting (pages 12-15)
- Caregiver Awareness (pages 16-21)
- Resident Mobility (pages 22-31)

You know your residents; we know the equipment. Call us with the unique caregiving challenges you face, and we'll do our very best to help you find solutions.

Fall Management Product Considerations

Resident Room	Product Considerations	Page
<p>Examples of some of the important areas to check include:</p> <ul style="list-style-type: none"> ■ Bed is locked; height is adjusted appropriately for transfers ■ Handrails for transferring are firmly attached at an appropriate height ■ Floor and walls have a clear and clutter-free path from the bed to the chair and to the bathroom ■ Lights work; lighting is set to minimize glare off walls and floor ■ Bedside table, call light and personal items are all within reach ■ If a personal alarm is in use, verify whether it's required and in use for bed, chair and wheelchair ■ Chairs in room are appropriate height for the resident to safely sit with their feet on the floor, and are suited for ease of transfer ■ Chairs are sturdy and in good condition ■ Call lights function and cords are selected that the resident is able to manipulate and use ■ Floors are dry 	<p>Products to consider:</p> <ul style="list-style-type: none"> ■ Adjustable-height low beds that allow for safer positioning and resident transfers ■ Mattresses with support bolsters that provide a reminder and soft support to help reduce slips or rolls ■ Safety rings and assist handles to help provide support for bed positioning and transfers ■ Consider a trapeze for residents who may have difficulty reaching or using a side-mounted handle. ■ If an alarm is indicated, consider alarms that connect to the nurse call system. This will reduce agitating noise and minimize anxiety, while still alerting the nursing team ■ Select call cords that the resident can hold and press; consider a flat pad or a breath-activated unit for residents who have difficulty holding and pressing a traditional call button 	<p>6-7</p> <p>8</p> <p>10</p> <p>16-17</p> <p>18-19</p>

Potential Product Considerations vary based on individual circumstances, and other options may exist.

Fall Management Product Considerations

Bathing & Toileting	Product Considerations	Page
Examples of some of the important areas to check include: <ul style="list-style-type: none"> ■ Call lights in room and bathroom work with adaptable cords, if needed ■ Raised toilet seat is in place, if applicable ■ Lighting is bright enough in shower areas, but minimized to avoid glare in bathrooms ■ Bath benches are at the appropriate height, rubber feet are intact and provide a firm floor grip ■ Verify all items are within reach – soap, shampoo, washcloth, towels, etc. ■ Sturdy transfer bars are placed at an appropriate height and in good condition; check shower area and bathrooms for transfer bars ■ Floors are dry 	Products to consider: <ul style="list-style-type: none"> ■ Verify raised toilet seats are the right height for the resident. Feet should be on the floor at all times. ■ Select bath benches that are adjustable in height and fit the shower area appropriately. Benches should be easy to transfer a resident to and provide enough support to allow the resident to feel comfortable and relaxed. ■ Place transfer bars in natural “grab” locations to help minimize reaching, which can throw residents off balance. 	12-13 14 15

Creating Caregiver Awareness	Product Considerations	Page
When an alarm or alert is utilized, keep these precautions in mind: <ul style="list-style-type: none"> ■ Ensure individualized resident assessments are completed and indicate the use of an alarm/alert ■ Check where and when an alarm/alert is needed. Consider all areas where one might be needed i.e., bed, chair, wheelchair ■ Alarms/alerts are checked daily to ensure batteries are charged, as indicated ■ Pad placements are checked after each transfer and re-positioning in bed, chair or wheelchair. Check for connection and proper placement ■ Verify caregivers are notified of changes to the care plan for the use of alarms/alerts ■ Evaluate effectiveness of the alarm/alert as an intervention, and adjust as indicated. ■ If color-coded identification is used, verify that the use of color is consistent within the facility and that staff are aware of the color distinction 	Examples of some of considerations when selecting an alarm/alert: <ul style="list-style-type: none"> ■ If an alarm is indicated, consider alarms that connect to the nurse call system. This will reduce agitating noise and minimize anxiety, ■ Consider ease of use when resetting the alarm/alert. ■ Consider using wireless alarms to reduce cords and wires. Examples of some of considerations when selecting patient identification: <ul style="list-style-type: none"> ■ Consider resident dignity when choosing a color-code to indicate fall risk. Be consistent in color selection 	16-17 21

Potential Product Considerations vary based on individual circumstances, and other options may exist.

Wheelchair & Mobility Aids	Product Considerations	Page
<p>Examples of some of the important areas to check:</p> <ul style="list-style-type: none"> ■ Wheelchair is the right size for the resident ■ Cushion is in good condition, with proper support selected for the resident's needs ■ Seat support is appropriate for the resident to provide a natural sitting position with proper support ■ Wheels move easily and are firmly attached. ■ Wheel locks are easy to manage and stay firmly locked until released ■ Leg/footrests are the right size and length ■ Leg/footrests are securely attached and easy to take on/off if needed ■ Anti-rollback and anti-tip devices are applied as indicated ■ Gait belts are in good condition with no rips or tears, and buckles work effectively; gait belts are in good supply ■ Walkers are properly fitted to the right size for the resident ■ Walkers are sturdy and in good condition ■ Walker wheels work, lock easily and stay firmly locked until released ■ Wheelchairs and walkers are cleaned and maintained regularly 	<p>Examples of some of the products to consider:</p> <ul style="list-style-type: none"> ■ Work with a therapist when sizing a wheelchair for the correct size. ■ Consider additional supports in a wheelchair to assist with reducing sliding and tipping. Cushions and positioners may provide some additional support. ■ Consider accessories for the wheelchair for residents to maintain personal items and a beverage. This can help prevent over-reaching for an item and loss of balance. ■ Evaluate the use of a tray or other convenience devices that attach to the chair, as these devices may be considered restraints. Consult your restraint use policies and all applicable laws and regulations. 	<p>24-25</p> <p>28-30</p> <p>31</p>

Resident Room

A.

PRESSURE REDISTRIBUTION

A. Direct Supply® Panacea® Original Plus Mattresses – our most popular foam mattress for wound management with 3" raised perimeters to help reduce risk of falls, limit the need for bedrails and make transfers easier

- Die-cut, high-density top layer in the head and torso area provides comfortable pressure redistribution and creates individual load-bearing cells to cradle residents; also allows air to flow and cool the sleep surface
- High-resiliency, super-soft foam heel area is 59% softer than the mattress body to protect vulnerable heels
- Full-length base provides a firm, supportive foundation to prevent bottoming out
- Four-way stretch, low shear, antimicrobial, fluid-resistant, breathable cover has fluid-proof bottom
- Concealed zipper prevents skin tears and protects foam from liquids
- Meets 16 CFR 1633
- 35"W x 6"H

Weight Capacity	350 lbs.
Warranty	7-year, non-prorated warranty

These pressure redistribution support surfaces are appropriate for use as part of an overall care plan to prevent and treat decubitus ulcers. Resident-specific assessment could alter your particular usage of these mattresses.

Panacea Original Plus with Optional Fitted Sheet

PRESSURE REDISTRIBUTION

B. Direct Supply® Panacea® Support Plus Mattresses – same great mattress as the Support with 3" raised perimeters to help reduce the risk of falls and limit the need for bedrails

- The die-cut top layer provides comfort and additional airflow to help reduce heat buildup at the resident's skin
- Convoluted cut middle layers provide suspension-like support while improving immersion, increasing the amount of support area and lowering average pressures
- Super-soft foam protects heels, while the sloped heel section redistributes weight to the calf area to provide further comfort
- Built-in firm foam side-perimeters help to ease resident transfers and help reduce the risk of falls
- Full-length base provides firm foundation to prevent bottoming out
- Concealed zipper prevents skin tears and protects foam from liquids
- Meets 16 CFR 1633

Fall Management Product Considerations

Resident Room

A. #93154

A. Direct Supply® Direct Choice™ Bedrail Wedge Pad – your economical option

- Unique design helps reduce entrapment between mattress and siderail
- Durable, easy-to-clean vinyl cover

#93155 Direct Choice Bedrail Wedge, 35"L set of 2
#93154 Direct Choice Bedrail Wedge, 70"L set of 2

B.

B. No-Slip Wedges™

- Positions residents at the optimal 30-degree side-lying position
- New zipper enclosure provides a fluid barrier inside and outside of the zipper for superior infection control
- Made of latex-free, antimicrobial and hypoallergenic materials
- No-slip bottom keeps the wedge in place and makes positioning more consistent and reliable
- Available in standard 20" length and now extra-long 26" length at no extra charge
- 3-year warranty; measures 20"W or 26"W x 11"D x 7"H (¼"H at low end)

#72982 No-Slip Wedge each
#73469 No-Slip Wedge case of 4
#73470 No-Slip Wedge case of 10

C. #24383

C. Halo Safety Rings – eliminate the four most critical zones of entrapment

- 90 degree rotation improves resident transfers, bed mobility and independence
- Meets and exceeds HBSW and FDA's dimensional guidelines against bed entrapment
- Made with durable steel construction for safe resident transfers
- 1,000 lb. capacity; 500 lb. capacity on the ALC model
- Fits most popular bed systems

#91865 Halo Safety Ring, Two Sides w/ Hardware
#91864 Halo Safety Ring, One Side & Mattress Stay Bar w/ Hardware
#24383 Halo ALC Safety Ring for Residential Beds, Two Sides w/ Hardware
#23149 Halo Limb Protector
#23150 Halo Circle Pad Protector

D. #91424

D. Assist Handles – are safe and effective

- Sturdy, removable handle for independent moving
- Assists residents when rolling, sitting, and standing without restraint
- Inside dimensions are less than 4"
- Meets state and federal guidelines

#91422 Transfer Handles for Pan-Style Beds set of 2
#91423 Transfer Handle for Pan-Style Beds each
#91424 Transfer Handles for Spring Beds set of 2
#91425 Transfer Handle for Spring-Style Beds each

E.

E. Advantage Rail™ Assist Devices – floor-mounted for safer independent standing and transfers

- Unique horizontal rail moves residents in small, safe steps
- Ideal for rooms where floor-to-ceiling pole cannot be used
- Suitable for toileting, getting into or out of tub, or bedside placement
- Quickly locks and unlocks for safe use
- Floor to handle measures 30-38"; handle length is 21¾"
- 300 lb. weight capacity

#09290 Advantage Rail Assist Device

F. Direct Supply® Panacea® Protector™

Bedside Mats – impact protection helps to keep residents safe and secure

- Beveled edge and nonskid bottom helps keep mat safely in place
- At 1"H, low profile allows equipment to roll easily and safely over edges
- Fire-retardant, high-density rebond core provides stable surface to walk on and absorbs impact of falls, decreasing the risk of injuries
- Reinforced, antibacterial vinyl has high tear resistance and strength for added durability
- Available in three colors: tan, gray and burgundy

#24009 Protector Bedside Mat, 24"W x 70"L

#24010 Protector Bedside Mat, 36"W x 70"L

Panacea® Protector Bedside Mat Color Options

G. Direct Supply® Panacea® Protector™ Deluxe Bedside Mats

– impact protection with a warm, homelike appearance

- Carpet covering for aesthetically pleasing appearance, while extra-thick rubber backing adds durability
- 1"-thick, high-density nitrile rubber foam core for low profile, allowing equipment to roll easily and safely over edges
- Beveled edge and nonskid bottom helps keep mat safely in place
- Medallion pattern available in jewel or earth tones to fit any décor
- Patterned rug-like appearance creates a homelike environment and looks less like a traditional fall mat

#24480 Protector Deluxe Bedside Mat, 33"W x 60"L

#36392 Protector Deluxe Medallion Pattern, 33"W x 52"L

Panacea® Protector Deluxe Bedside Mat Color Options for Medallion Pattern

Hipsters Sizing Guide

Size	Waist	Hips
Small	28" to 30"	35" to 37"
Medium	30" to 34"	37" to 41"
Large	34" to 38"	41" to 45"
X-Large	38" to 42"	45" to 49"
XX-Large	42" to 46"	49" to 53"

Fall Management Product Considerations

Resident Room

A. #54638 and #54640

B. #91473

A. Free-Standing Overbed Trapezes – 250 lb. capacity

- Nylon-covered, fixed-offset trapeze bar provides secure gripping
- Wide range of height adjustments and handbar positions lets residents change position and transfer in and out of bed with minimal assistance
- Assembles without tools; features bumpers and padded mounting brackets to help protect walls from damage
- Installs easily into the sturdy floor stand, which slides under the head of the bed and folds flat when not in use
- This trapeze may not be clamped onto a headboard unless the headboard is metal framed – trapeze must be supported by its stand

#54638 Trapeze Bar, 61"H, 34" Reach

#54640 Floor Stand, 38"H x 32"W x 40"L

B. Bariatric Overbed Trapezes – 600 or 850 lb. capacity

- Wheels allow trapeze to be easily transported with no need for disassembly
- Stainless and carbon steel construction make these trapezes strong and attractive
- Extension boom attaches to 68" tall vertical support, and triangle-shaped trapeze bar is suspended from the boom by nylon straps to avoid corrosion and rust
- 2¼"H pinned floor base extends 4' under the bed; separates easily for storage
- 68"H with a 42" reach
- Beachwood powdercoat finish

#91473 600 lb. Capacity Bariatric Trapeze

#59090 850 lb. Capacity Bariatric Trapeze

When to Choose Trapezes

Trapezes are either secured to a floor stand or mounted directly to the head of a resident's bed. They allow residents to reposition themselves in bed without calling for a caregiver's assistance. Residents can also use them for help getting in and out of bed.

C. Economy Momentary Cords – dependable and affordable

- Feature raised red button and winged pendant for easy grip
- Comes with non-removable, stainless steel bed sheet clip
- Cords are non-repairable
- Two conductor, ¼" plug

Single Momentary

#43366 6' Cord

#43367 8' Cord

#43368 10' Cord

Fall Management Product Considerations

Caregiver Awareness

A.

A. Direct Supply® Attendant® Economy Pressure Pad Alarms – help to ensure resident safety for less!

- **Automatic reset** – shuts alarm off as soon as pressure is reapplied to pad, reducing false alarms
- **Volume options** – two-position volume adjustment; 98 dB low or 108 dB high at a distance of 10 cm
- **On/off switch** – can disable all functionality to preserve battery life
- **Low battery alert** – LED light and audible chirp alert caregivers when battery is near expiration
- **Protective boot** – comes standard
- **In-use light** – notifies you at a glance that the unit is properly operating
- **Attachment style** – attaches to wheelchair or bedrail with standard mesh strap, optional bedrail clip, or optional chair clip
- **Versatile** – alarm can be used with bed and chair pads
- **Power source** – runs on one 9V battery (not included); can also operate on 120V AC

D.

D. **Direct Supply® Attendant® Voice Pressure Pad Alert** – optional timed pad helps you maintain compliance

► **FLAT-RATE SHIPPING** – only \$11 per shipment!

- **Customizable alert** – record your own 15 second message to assure residents in a calm, familiar voice that help is coming
- **Timed Pads** – optional self-timing pads help maintain F-Tag compliance by tracking usage
- **Nurse call capability** – a nurse call jack allows for use with most nurse call systems, helping alert caregivers to residents rising without aid
- **Alert delay** – three-position alarm delay adjustment; 0, 1 or 2 seconds; if pressure is restored within this time, no alert is sounded
- **No On/off switch** – alarm cannot be turned off accidentally
- **Automatic reset** – shuts alarm off when pressure is reapplied to pad, helping to reduce false alarms
- **Volume options** – three-position volume adjustment; silent, 98 dB low or 108 dB high at a distance of 10 cm
- **Low pad life alert** – special pads automatically count down, and send audible or visual alerts when pad life is near expiration
- **Protective boot** – comes standard

A.

A. Direct Supply® Attendant® Magnet Alarms – low-battery alert notifies caregivers

- **Nurse call capability** – deluxe model includes nurse call jack option for call cord accessories to connect the alarm with most hardwired nurse call systems
- **Volume adjustment** – Economy unit has two-position adjustment while deluxe has three-position adjustment: silent, 98 dB low and 108 dB high at a distance of 10 cm
- **No on/off switch** – reducing resident tampering
- **Protective boot** – protects alarm if dropped, extending useful life
- **Low-battery alert** – light and alarm “chirp” notifies caregivers when battery is near expiration
- **Attachment style** – clip attaches securely to resident’s clothing; alarm attaches to wheelchair or bedrail with nylon strap or bedrail clip (optional)
- **Power source** – runs on one 9V battery (not included)

How to Use Gait Belts

Gait belts are often misused as lifting aids, but are actually designed to be assistive devices to facilitate balance and body positioning. Gait belts are placed around a resident's waist to help caregivers with repositioning, assistance with standing, transferring and providing steadying support and balance during ambulation.

Fall Management Product Considerations

Mobility Products

A. Tracer® EX2 Wheelchairs – dual-height chair provides supreme flexibility!

- **Enhances resident safety** – multiple seat height options provide versatility and adjustability for a safe, comfortable fit
- **Accommodates multiple residents** – many front rigging and armrest options suit your diverse resident population
- **More comfortable seating** – permanent offset armrest option allows residents to use entire width of seat
- **Increased wheelchair lifespan** – double-embossed, 33 oz. vinyl upholstery is flame retardant, bacteria resistant, easy to clean and extremely durable

Wedge w/ Pommel

#90971 16"W x 16"D

Anti-Thrust

#90972 18"W x 16"D

#90973 20"W x 16"D

Call your Account Manager for bariatric options.

B. Direct Supply® Panacea® Pro Cushions with Gel

- Four-chamber design ensures gel will stay in high-pressure areas; provides better stability
- High-viscosity, low-permeability formulation won't dry out, requires no kneading
- Round bottom to prevent hammocking on sling seats
- Two-density, high-resiliency foam provides positioning support and longevity
- Soft foam topper for comfort and pressure redistribution
- Four-way stretch cover is moisture-resistant, antimicrobial and breathable; allows for maximum immersion
- Anti-thrust option, measuring 3" at the front and 2" at the back, prevents thrusting for more active residents; 1" midline shelf prevents ischials from "sliding" forward and controls hip rotation
- Straps included for securing cushion to chair
- 250 lb. weight capacity
- Wedge: 4"H at front, 3"H at back

Wedge

#58163 16"W or 18"W x 16"D
